CALL FOR PAPERS

The third International Conference on Digital Economy (ICDEc) will take place from May 3rd to 5th, 2018 in Brest Business School, France.

The purpose of the Conference is to promote innovative research that highlights the impact of emerging technologies on digital economy, with in particular, the role of Cloud Computing, Big Data and mobile technologies on business innovation. The ICDEc conference focuses on new models and applications in management, digital marketing, e-pedagogy, web intelligence, e-commerce and security.

The conference chairs invite researchers to submit contributed papers, case studies, special topic session proposals and roundtable discussion proposals. Submissions should focus on technological or business concerns. Registered and presented papers will be published in **Springer LNBIP**. Papers can be submitted either in English or in French. Only english papers that will be published.

Topics

Emerging technologies: Web Intelligence Technologies, Big Data, Knowledge Discovery and Management, Intelligent Agent Systems, Web Security, Legal and technical issues in online Data security

Business innovation: Digital transformation processes in the private and public sectors, E-marketing and e-commerce, E-finance, E-learning and e-pedagogy
