CALL FOR PAPERS

The second International Conference on Digital Economy (ICDEc) will take place from May 4th to 6th, 2017 in Sidi Bou Said – Tunisia.

The purpose of the Conference is to promote innovative research that highlights the impact of emerging technologies of the digital economy, with in particular, role of Cloud Computing, Big Data and mobile technologies on business innovation. The ICDEc conference focuses on new models and applications in management, digital marketing, web intelligence, e-commerce and security.

The conference Chairs invite researchers to submit contributed papers, case studies, special topic session proposals and roundtable discussion proposals. Submissions should focus on technological or business and marketing concerns.

Registered and presented papers will be submitted for inclusion in Springer Library.

Topics

Emerging technologies: Web Intelligence Technologies, Big Data, Knowledge Discovery and Management, Intelligent Agent Systems, Web Security.

Business innovation: Digital Technology & New Business Models, Innovation & Digital Economy, Digital Marketing, E-learning: pedagogical and intelligent approaches.
